# UniStream<sup>®</sup> Built-in

Technical Specifications US5-B5-R38, US5-B10-R38 US5-B5-T42, US5-B10-T42 US7-B5-R38, US7-B10-R38 US7-B5-T42, US7-B10-T42

Unitronics' UniStream<sup>®</sup> Built-in series are PLC+HMI All-in-One programmable controllers that comprise built-in HMI and built-in I/Os.

## Model numbers in this document

- **Beginning**: model numbers beginning with USx refer to any member of the Built-in series
- **Middle**: the series is available in two versions: UniStream Built-in and UniStream Built-in Pro. Model numbers including:
  - **B5** refer to standard UniStream Built-in (e.g. USx-B5-R38)
  - B10 refer to UniStream Built-in Pro (e.g. USx-B10-R38)
     B10 models offer additional features, detailed below.
     If the letter "B" is followed by "x" it refers to both B5 and B10 models.
  - **End**: the end of the model number indicates the built-in I/O as shown in the example table below. This document provides the specifications for the I/Os.

| USx-Bx-R38  | USx-Bx-T42  |  |
|---|---|--|
| • 24 x Digital inputs, 24VDC, sink/source,  |   |  |
| <ul> <li>including 4 High speed counter input channels <sup>(1)</sup></li> <li>2 x Analog inpOuts, 0÷10V / 0÷20mA, 12 bits</li> </ul> | • 24 x Digital inputs, 24VDC, sink/source, including 4 High speed counter input channels <sup>(1)</sup> |  |
| <ul> <li>12 x Relay outputs</li> </ul>  | • 2 x Analog inputs, 0÷10V / 0÷20mA, 12 bits  |  |
|   | <ul> <li>16 x Transistor outputs, pnp,<br/>including 2 PWM output channels</li> </ul>                   |  |

| Power Supply    |     | USx-Bx-R38         | USx-Bx-T42         |  |
|-----------------|-----|--------------------|--------------------|--|
| Input voltage   |     | 24VDC              | 24VDC              |  |
| Permissible ran | ge  | 20.4VDC to 28.8VDC | 20.4VDC to 28.8VDC |  |
| Max.<br>current | US5 | 0.48A@24VDC        | 0.4A@24VDC         |  |
| consumption     | US7 | 0.57A@24VDC        | 0.49A@24VDC        |  |
| Isolation       |     | None               |                    |  |

| Display                            | UniStream® 5"   | UniStream® 7" |  |
|------------------------------------|---|---------------|--|
| LCD type                           | TFT   |               |  |
| Backlight type                     | White LED   |               |  |
| Luminous intensity<br>(brightness) | Typically 350 nits (cd/m2), at 25°C Typically 400 nits (cd/m2), at 25°C |               |  |
| Backlight longevity                | 30k hours   |               |  |
| Resolution (pixels)                | 800 x 480 (WVGA)  |               |  |

## **Technical Specifications**

| Size                     | 5″ 7"  |  |  |
|--------------------------|--|--|--|
| Viewing area             | Width x Height (mm) 108 x 64.8Width x Height (mm) 154.08 x 85.92 |  |  |
| Color support            | 65,536 (16bit)   |  |  |
| Surface treatment        | Anti-glare   |  |  |
| Touch screen             | Resistive Analog   |  |  |
| Actuation force<br>(min) | > 80 g (0.176 lb)  |  |  |

| General  |   |  |  |
|--|---|--|--|
| I/O support  | Up to 2,048 I/O points  |  |  |
| Built-in I/O   | According to model  |  |  |
| Local I/O expansion To add local I/Os, use UAG-CX I/O Expansion Adapters <sup>(3) (4)</sup> . These adapters provide the connection point for standard UniStream Uni-I/O <sup>™</sup> modules. |   |  |  |
| Communication ports  |   |  |  |
| Built-in COM ports Specifications are provided below in the section Communications   |   |  |  |
| Add-on Ports   | Add up to 3 ports to a single controller using Uni-COM <sup>™</sup> UAC-CX Modules <sup>(4)</sup> . |  |  |

| Internal memory | UniStream <sup>®</sup> Built-in  | UniStream <sup>®</sup> Built-in Pro |  |
|-----------------|--|-------------------------------------|--|
|                 | RAM: 512MB RAM: 1GB  |                                     |  |
|                 | ROM: 3GB system memory   | ROM: 6GB system memory              |  |
|                 | 1GB user memory  | 2GB user memory                     |  |
| Ladder memory   | 1 MB   |                                     |  |
| External memory | microSD or microSDHC card  |                                     |  |
|                 | Size: up to 32GB   |                                     |  |
|                 | Data Speed: up to 200Mbps  |                                     |  |
| Bit operation   | 0.13 µs  |                                     |  |
| Battery         | Model: 3V CR2032 Lithium battery <sup>(5)</sup>                        |                                     |  |
|                 | Battery lifetime: 4 years typical, at 25°C                             |                                     |  |
|                 | Battery Low detection and indication (via the HMI and via System Tag). |                                     |  |

| Audio (Pro B10 models only) |  |  |  |
|-----------------------------|--|--|--|
| Bit Rate                    | t Rate 192kbps   |  |  |
| Audio compatibility         | Stereo MP3 files   |  |  |
| Interface                   | 3.5mm Audio-out jack - use shielded audio cable of up to 3 m (9.84 ft) |  |  |
| Impedance                   | 16Ω, 32Ω   |  |  |
| Isolation                   | None   |  |  |

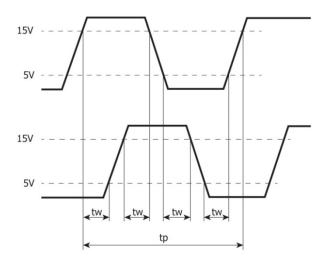

| Video (Pro B10 models only) |                           |  |
|-----------------------------|---------------------------|--|
| Supported Formats           | MPEG-4 Visual , AVC/H.264 |  |

# Communication (Built-in Ports)

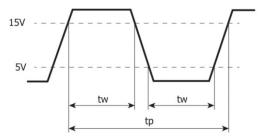

| Ethernet port             |  |  |
|---------------------------|--|--|
| Number of ports           | 1  |  |
| Port type                 | 10/100 Base-T (RJ45)                       |  |
| Auto crossover            | Yes  |  |
| Auto negotiation          | Yes  |  |
| Isolation voltage         | 500VAC for 1 minute                        |  |
| Cable                     | Shielded CAT5e cable, up to 100 m (328 ft) |  |
| USB device <sup>(6)</sup> |  |  |
| Number of ports           | 1  |  |
| Port type                 | Mini-B                                     |  |
| Data rate                 | USB 2.0 (480Mbps)                          |  |
| Isolation                 | None                                       |  |
| Cable                     | USB 2.0 compliant; < 3 m (9.84 ft)         |  |
| USB host                  |  |  |
| Number of ports           | 1  |  |
| Port type                 | Туре А                                     |  |
| Data rate                 | USB 2.0 (480Mbps)                          |  |
| Isolation                 | None                                       |  |
| Cable                     | USB 2.0 compliant; < 3 m (9.84 ft)         |  |
| Over current protection   | Yes  |  |

| Digital Inputs    |   |  |  |
|-------------------|---|--|--|
| Number of inputs  | 24                                      |  |  |
| Туре              | Sink or Source                          |  |  |
| Isolation voltage |   |  |  |
| Input to bus      | 500VAC for 1 minute                     |  |  |
| Input to input    | None                                    |  |  |
| Nominal voltage   | 10-19, 118-123: 24VDC @ 6mA             |  |  |
|                   | I10-I17: 24VDC @ 8mA                    |  |  |
| Input voltage     |   |  |  |
| Sink/Source       | ink/Source On state: 15-30VDC, 4mA min. |  |  |
|                   | Off state: 0-5VDC, 1mA max.             |  |  |
| Nominal impedance | al impedance I0-19, I18-I23: 4kΩ        |  |  |
|                   | 110-117: 3kΩ                            |  |  |
| Filter            | 10-19, 118-123: 6ms typical             |  |  |
|                   | I10-I17: 5.5µs, 50µs, 0.5ms, 6ms, 12ms  |  |  |

| High speed inputs <sup>(1)</sup> |  |
|----------------------------------|--|
| Frequency /<br>Period            | Pulse/Direction mode: 90kHz max. / 11.1 $\mu$ s min (t <sub>p</sub> in the Pulse/Dir Mode figure below). |
|                                  | Quadrature mode: 80kHz max. / 12.5 $\mu$ s min (t <sub>p</sub> in the Quadrature Mode figure below).     |
| Pulse width                      | Pulse/Direction mode: $5.1\mu$ s min. for each state (t <sub>w</sub> in Pulse/Dir Mode figure below).    |
|                                  | Quadrature mode: $2.5\mu$ s min. for each state ( $t_w$ in Quadrature Mode figure below).                |
| Cable                            | Shielded twisted pair  |

UniStream 5"

#### UniStream 7"

### Notes:

- 1. Eight of the digital inputs (I10-I17) may be configured to function either as normal, or as high speed digital inputs, that can receive high speed pulse signals from up to two sensors or shaft encoders.
- 2. The HMI panel's backlight longevity is the typical operating time after which the brightness drops to 50% of its original level.
- 3. UAG-CX Expansion Adapter Kits comprise a Base unit, an End unit, and a connecting cable. You plug the Base Unit into the controller's I/O Expansion Jack and connect standard UniStream Uni-I/O<sup>™</sup> modules. For more information, refer to the product's installation guide and technical specifications.
- 4. Uni-COM<sup>™</sup> CX modules plug directly into the Uni-COM<sup>™</sup> CX Module Jack on the back of the controller.

UAC-CX modules may be installed in the following configurations:

- If a module comprising a serial port is snapped directly into to the back of UniStream<sup>™</sup>, it may be followed only by another serial module, for a total of 2.

- If your configuration includes a CANbus module, it must be snapped directly to the back of UniStream. The CANbus module may be followed by up to two serial modules, for a total of 3. For more information, refer to the product's installation guide and technical specifications.

- 5. When replacing the unit's battery, make sure that the new one has environmental specifications that are similar or better than the one specified in this document.
- 6. The USB device port is used to connect the device to a PC.
- 7. The 4-20mA input option is implemented using 0-20mA input range.
- 8. The analog inputs measure values that are slightly higher than the nominal input range (Input Over-range).

Note that when the input overflow occurs, it is indicated in the corresponding I/O Status tag while the input value is registered as the maximum permissible value. For example, if the specified input range is  $0 \div 10V$ , the Over-range values can reach up to 10.15V, and any input voltage higher than that will still register as 10.15V while the Overflow system tag is turned on.

- 9. The diagnostics results are indicated in the system tags and can be observed through the UniApps<sup>™</sup> or the online state of the UniLogic<sup>™</sup>.
- 10. Step response and update time are independent of the number of channels that are used.
- 11. Life expectancy of the relay contacts depends on the application that they are used in. The product's installation guide provides procedures for using the contacts with long cables or with inductive loads.
- 12. Outputs O0 and O1 can be configured as either normal digital outputs or as PWM outputs. PWM outputs specifications apply only when outputs are configured as PWM outputs.
